

REF **428-003**

MULTISPORT POSTS KIT

TELESCOPIC, IN ANODIZED ALUMINUM, TO BE CLIPPED INTO THE GARD&ROCK ANCHORING BASE

Actual product may differ from photos

AT HOME, WITH FRIENDS OR ON HOLIDAY, YOU CAN QUICKLY TRANSFORM YOUR SPACE INTO A GENUINE TENNIS, BADMINTON OR VOLLEYBALL COURT WITH THIS SIMPLE GROUND CLIP SYSTEM.

REF **428-003**

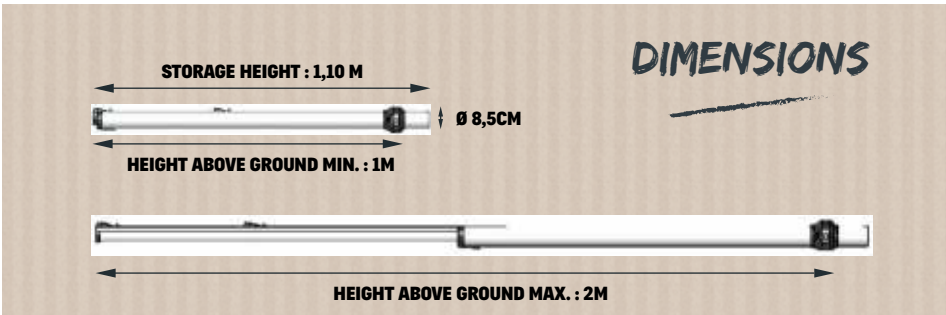

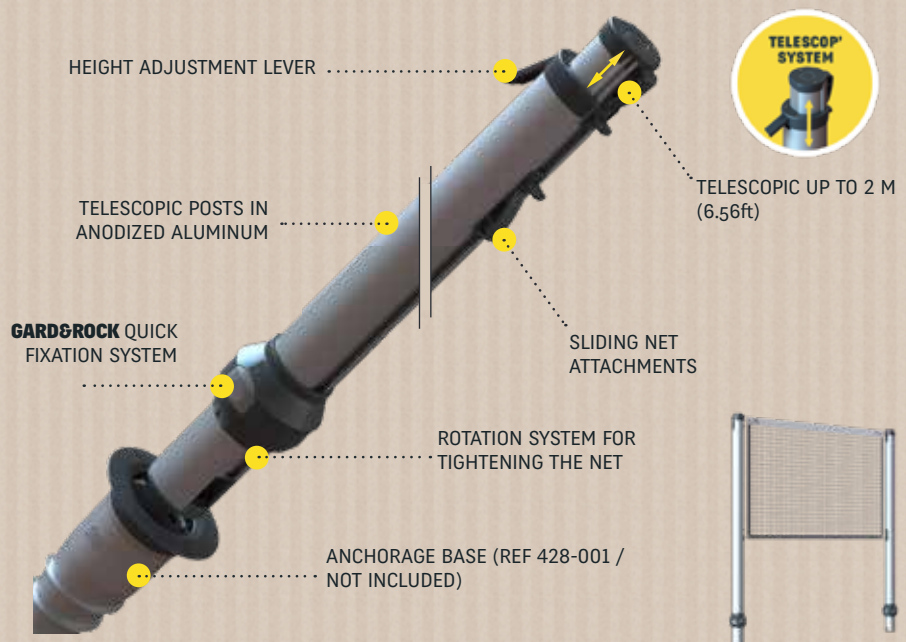

Our French team invented an innovative ground clip system (Quick Fixation System). It comprises telescopic posts that simply clip into Gard&Rock anchoring bases (sold separately) screwed into the ground. Suitable for all types of ground, even sloping ground (clay, tarmac, lawn, stabilized ground, etc.), you can install your multisport posts, in a perfectly upright position in an instant. They are simple to remove for easy storage and will not obstruct your garden. You can even install other equipment, such as an umbrella or rotary washing line, for example.
